TensoSottile Monoemissione

CL164000W2

Coming soon.

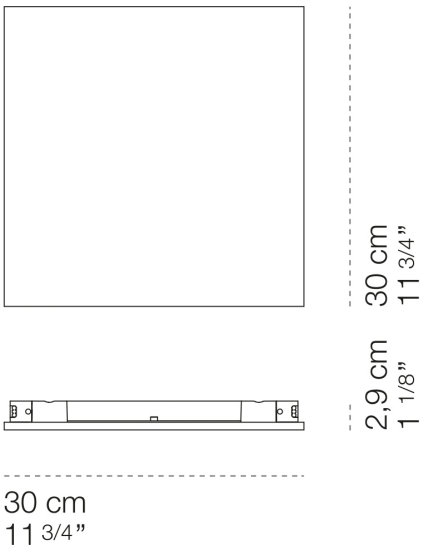

Tenso Sottile is the new evolution of the Tenso family, designed by Cini&Nils for wall-to-wall suspended cable installations. Thanks to its square, slim and flat shape, this lamp is an ideal solution for rooms where decorated ceilings, exposed beams or special architectural structures prevent the use of suspensions or ceiling lights. Perfect for illuminating the centre of the room or following the line of the ceiling, it stands out for its matt black silicone cables and matching ceiling rose, which give it a modern and elegant touch. Tenso Sottile is distinguished by its versatility and minimalist design. Available in two variants, one with indirect light and one with indirect and direct light, it allows maximum compositional freedom. The modules, to be positioned at a minimum distance of about 800 mm, allow the light to be adapted to the specific needs of the space and the desired level of brightness. Combining practicality and elegance, Tenso Sottile turns light into a distinctive element that enhances any room with style.

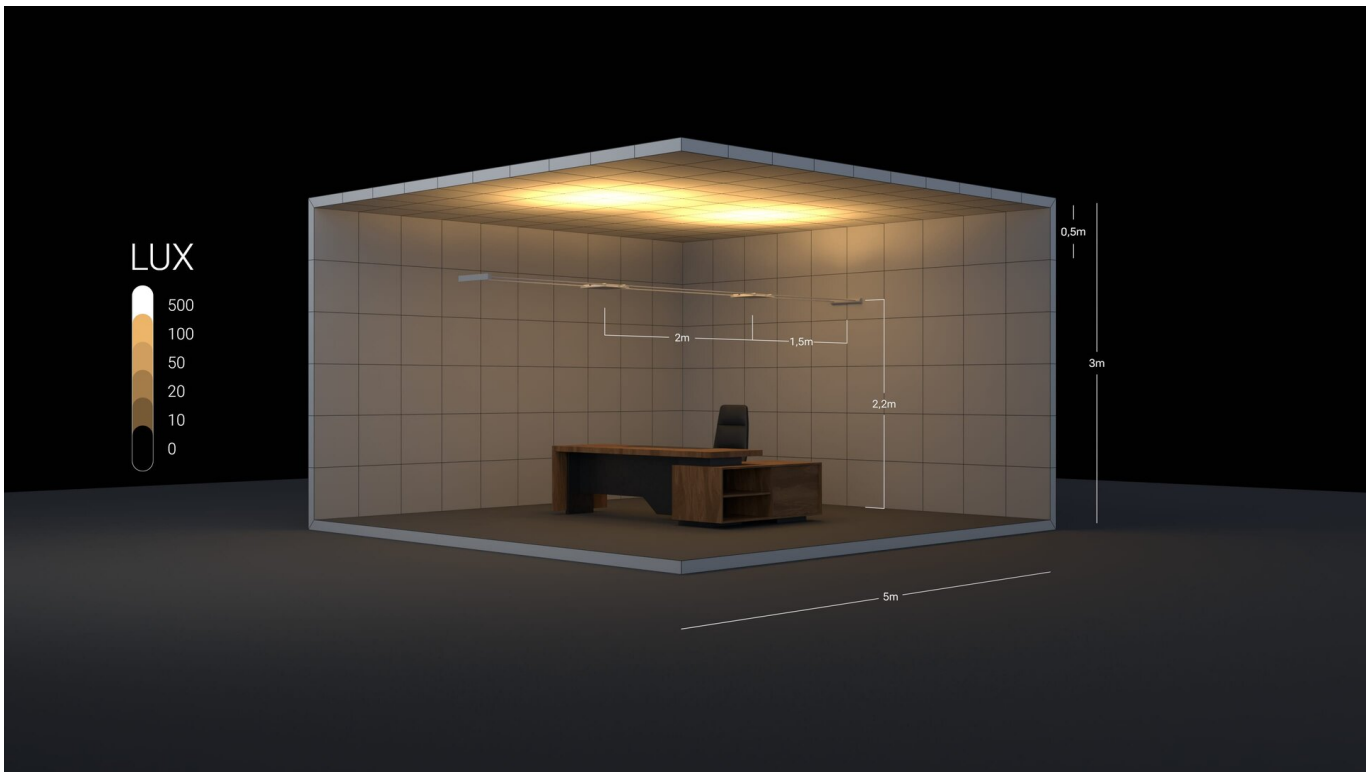

Characteristics

Material	PMMA, Aluminium
Finish	White
Configuration	Double horizontal wire
IP rating	IP 20
Insulation class	1
Lamp/Led	LED
Power supply	included
Dimming	On-off
Watt	25W
Volt	220-240V
°K	2.7K
Emission	Single-emission
Lumen	3.750 lm
Width (mm)	300
Length (mm)	300
Height (mm)	29
Certifications	CE, UKCA
Year	2025

Color: White
