

Kamishibai
INGO MAURER TEAM 2023

The Kamishibai luminaire by Ingo Maurer represents a new dimension in lighting design and interior architecture. Its flexible form, exceptional craftsmanship, and originality make it an extraordinary design object. The basic idea of the luminaire is based on three interconnected surfaces whose angles can be adjusted in relation to each other. It invites users to play, explore, and experiment with light, color, and reflection, offering endless possibilities for personalizing a space.

Light source

LED strip, 24 V DC, 8.5 W, 730 lm, 2700 K, CRI > 90, EEC F (A–G). The LED light sources cannot be replaced by the user, but may be replaced by a qualified professional.
