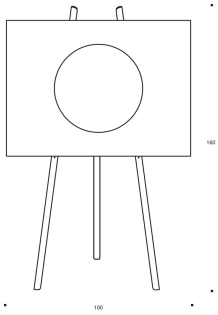
MOODMOON framed
SEBASTIAN HEPTING 2023



MOODMOON framed joins the existing MOODMOON family of lamps by designer Sebastian Hepting: MOODMOON framed can be hung on the wall like a picture or used as a floor or table lamp. This is made possible by a sturdy metal frame covered with Japanese paper in which the light source is installed. MOODMOON framed offers light in different moods, ranging from LIQUID GOLD, which is reminiscent of molten, flowing gold and provides pleasant light in the living room, to INDIGO, a deep blue light that radiates calm and tranquillity. MOODMOON framed offers a total of 17 moods, eight of which are new and have been specially developed for the framed version. The closed frame allowed the designer to experiment with colourful compositions, as the colour does not radiate onto the wall but is held impressively in the frame. As with the classic MOODMOON, the various lighting moods can be selected and dimmed using the free Ingo Maurer Digital App. The luminaire contains a WLAN module. Integration into an existing Wi-Fi network is possible. The framed utilises the same proven lighting concept on which the classic MOODMOON is based: Human Centric Lighting.

**Light source**
LED strip max. 45 W, EEC G (A-G). The LEDs cannot be replaced by the user, but can be replaced by specialists.

**Technical data**
100-240 Volt 50/60Hz

**More info**
Direct connection to a wall outlet possible. The Ingo Maurer Digital App is available free of charge in the App or Android Store. The tripod shown is optionally available.

**Colours**
Frame, cable and Japanese paper: white. The tripod is made of untreated, light-coloured ash wood.
