

Tubular Balance
SEBASTIAN HEPTING, INGO MAURER TEAM 2021

Tubular Balance is a member of the 'Tubular' luminaire family. With its length of 125 cm, this table version of the filigree tubular glass luminaire also illuminates a particularly wide area - ideal for use at desks and in offices. Tubular Balance does not require a ceiling outlet, but can be connected to a socket. It hangs from the ceiling on a thin cable and is combined with a lamp base as a counterweight. This keeps the glass tube suspended by means of a pull cord.

Light source

LED strip, 1647 lm, 3000 K, 12 V, 26.8 W, 25000 h, CRI 90+, EEC F (A-G), cannot be replaced by the user, but can be replaced by specialists.

Colours

Cable/tube: red/red, white/white
