DESCRIPTION

Alphabet of light system is a lighting language that continues to grow with new curved elements so it can be developed with increasing freedom throughout space. It is a basic principle that generates an open system implementing just a handful of basic modules. Thanks to specific geometric proportions, these modules can be combined together to form endless lighting structures, from the most elemental to the most complex, both linear and curved. The BIG idea is combined with Artemide's optoelectronic expertise to give rise to an innovative construction principle that casts continuous and comfortable light. It is a minimal presence that conceals ultra-sophisticated optoelectronic and patented mechanical innovation as well as ground-breaking control. The system can be controlled using the Artemide App to create freedom both in geometric design and in the definition of dynamic performance levels, which can be programmed or modified in real time.
